

List of BRANDS | JUST EASY TOOLS

We started with our Easy Stacker 1200 for truck tyres and Easy Gripper 2160 for handling and manipulation of agriculture tyres and wheels and for other applications, like harbor cranes etc., with a lifting capacity up to 1 ton.

When the Gripper was used on front loaders and on telehandlers, these carriers were already equipped with a tilt function. We then developed the Compact version without the tilt module, which makes the total configuration more handy, improves the center of gravity and reduces the cost price. This new Easy Gripper Compact received an award as best new product at Agromek in 2012.

We use high quality components and suppliers, and everything is tested before delivery. We have customers in most parts of the world, and we do our very best to avoid any claims.

If you should have any interest in our tools, we try to have dealers around the world with demo equipment, where you can see and maybe try our tools. But you are also very welcome to visit us here in Denmark.
