

WIKAI Mobile Control is the world market leader in safe load indication for telescopic and lattice boom cranes and a specialist for robust control solutions in mobile machines. The company sets standards in innovative automation platforms for mobile applications in harsh environments.

As a reliable, innovative, and flexible provider with 50 years of expertise in leading-edge technology, high-quality products, and first-rate services, WIKAI Mobile Control is committed to lay the foundation to ensure that today's components and solutions already comply with tomorrow's specific safety requirements.

Consoles

vSCALE consoles are user-friendly HMI interfaces for mobile applications under extreme environmental conditions.

Safe Load Indication

WIKAI Mobile Control safe load indicators deliver safety for your crane. Simple configuration and out-of-the-box functionality support easy set-up and installation.

Controls

cSCALE Controls provide tailored control solutions for mobile machinery that can be extended and grow in line with any requirement.

I/O Signal Capture

With the cSCALE DIO (distributed I/O) WIKAI Mobile Control offers a versatile and extremely robust I/O module for decentralised detection of analog and digital sensor signals by CAN bus.
