

Fujikura Ltd., established in 1885 has grown to become one of Japan’s foremost manufacturers and largest producers of electric wire and cable, optical fiber and related products and materials. Fujikura’s extensive product lineup and vast expertise are the result of more than a century in business coupled with vitality and aggressiveness that permeates the entire Company. Always consistently introducing revolutionary technologies and innovative products to respond to diverse customer needs.

Fujikura is committed to enhancing global business development. Therefore, Fujikura Asia Limited was set up in January 1987 to function as a regional headquarters for Southeast Asia. Today, Fujikura Asia Limited offers a growing range of products and services. Main products include optical fibers and optical components, various electronic materials and multi-layer and fine pitch flexible printed circuits, offering steadfast dependability in most field related to wires and cables for the telecommunications, energy and electronics industries. In addition, we also provide services such as calibration, repairs and technical Support for AFL NOYES products to cater to the needs of our customers.

List of BRANDS | FUJIKURA

Overhead Transmission Lines (OHTL)

Aluminium Conductor Steel Reinforced and Optical Ground Wires | Aluminium Conductor Steel Reinforced | Optical Ground Wires

Instrumentation Cables

Insulated Collective Screen Cables | Insulated Armoured and Unarmoured Cables | Insulated Individual and Collective Screened Cables | Insulated with and without Individual and Collective Screen Cables | Insulated AI HDPE Moisture Barrier Individual Screen Cables

Power Cables

MV XLPE Cables | LC PVC/PE/XLPE/EPR Cables | Control Cables | Lead Sheathed Cables | Bare Conductors | Copper Conductors | Aluminium Stranded Conductors | Aluminium Stranded Steel Reinforced Conductors | Aluminium Alloy Stranded Conductors

Special Cables

Automobile Cable | Flat-Type Elevators Cables | Fire Resistant Cables | Flame Retardant Cables | XLEVA Insulated Cables | Clean Cables and ECO Cables | Offshore Cables | Cold Resistant Cables | Thermocouple | Leaky Coaxial Cables (LCX)

Eco Cable

Fujikura's eco wires and cables are manufactured with unique new eco materials produced using its sophisticated eco-technology. They differ from conventional eco wires and cables in their use of lighter specific gravity sheath (approx. 1.1), and so can be distinguished from polyvinyl chloride sheath which has a specific gravity of approx. 1.4. They also provide clearer coloring, weather resistance and flexibility equal to or even better than polyvinyl chloride.
